

To Whom It May Concern:

I know I am just one person, but when I feel my rights are being encroached upon I can't help but try to be heard. When I heard the National Association of Broadcasters was trying to dictate what I can and cannot listen to on satellite radio, I was appalled. I PAY for satellite radio because it provides the quality and programming I cannot find elsewhere. I expect to be able to hear valuable information like traffic and weather, locally and nationally, as I also use my radio service in my car and it is important for me to have that availability. News, traffic, weather, and music are all so much better on satellite radio than that offered on different outlets, like local radio for example. I live in Deltona, Florida, and to be honest with you Orlando radio is terrible! Unreliable information, crass DJ's and newscasters, I have no patience for it and so I found a solution. Frankly, I pay for this service because I use it and enjoy it. With utmost respect, PLEASE reject the NAB's petition 04-160. Just one concerned listener would be very thankful if you do.

Sincerely,  
Denise Mathes  
Deltona, FL
